## 100% Neoprene Anaesthetic Face Mask

Neoprene Masks are unique due to their design and choice of material. The use of Neoprene means the masks are latex-free and therefore ideal for patients and staff who are allergic to latex. Neoprene is less reactive to external factors, making the life-span of these masks longer than that of comparable products.

Profiled Inflatable Cuff to facilitate optimum air-seal with patient's face makes this an ideal anaesthetic mask to replace (old-fashioned) Black Rubber Masks.

Decontamination / Disinfection by Immersion Only
